

Name: _____
 Class/Period: _____
 Date: _____

Topic/Objective:
Ch 3 Part 4
Avoiding Common Errors

Essential Question(s): ***What are common errors to avoid when calculating and displaying quantitative data?***

Questions:
Write 2-3 study questions in this column to correspond with the notes.

Directions for the Cornell Notes:

- 1) Read pages 67-69 (“What Can Go Wrong” section)
- 2) Write down any important tips or ways to properly work with data

Remember these notes are to HELP YOU, so write anything down from the reading that you may need to understand the material and use on work.

After doing the reading and notes, come to class with any questions about the material for me. Write these on the left side of your notebook, and take notes only on the right. I will do my best to address these questions in class or at study hall.

Summary:

Write 3-5 quality sentences to answer the essential question.

Use proper writing techniques.
